

# Engineered to Deliver

## THE 2009 TECHNOLOGY TOP 100 AWARDS

Acknowledging the successes that today's businesses enjoy through their development and use of **TECHNOLOGY, INNOVATION and PEOPLE**

**ELB Engineering Services (PTY) Ltd** has won the Management of Technology award at the Technology Top 100 presented at the Vodadome at a glittering gala event on Thursday the 28<sup>th</sup> of April 2010. The award was presented by the Minister of Science and Technology, Naledi Pandor placing the company amongst SA's technology elite. The Department of Science and Technology's 2009 top accolade in the Technology category was awarded for ELB's innovative application of technology.

The Technology Top 100 programme is focused on identifying the true South African role models who through innovation, tenacity and a passionate belief in people, have been able to take their organisations to new levels of competitiveness. The programme seeks to identify role models who are either users or developers of technology.

The TT100 adjudication team probed deeply into the processes which an organization deploys in the management of technology. Of key interest are the processes that are deployed to develop, implement and monitor the technology strategy. A winning company devotes attention to the technology life cycle, ensuring that they have a healthy mix of Emerging, Pacing, Key and Base Technologies. Fundamental to the effective Management of Technology are the tools deployed to maintain and enhance competitive advantage. Technology Top 100 winners focus on improvement of quality and productivity, higher flexibility, cost leadership and new market exploitation.

The entrants of the TT100 programme include a wide spectrum of operations in diversified industries. They exemplify the reality that irrespective of what business they are in, they cannot escape the fact that technology will alter their world.

This awards programme recognises these organisations as sustainable, high- performance operations.
